We asked your opinion about .package and .sims3pack file format for custom content, and the 60% of people seems to prefer .sims3pack to install custom contents in The Sims 3. Due to your preference and our considerations ([long explained in this article](#)), we will support .sims3pack. When possible we try to give you the choice and insert the .package version too (we try to think to the 40% of people too ;)!). So the poll is closed now!
