If you have installed the patch 1.12/2.7/3.3 or Ambitions, you have noticed that **Create a world** has stopped to work. If you launch the tool you get an error.

Good news guys, finally EA has solved this issue. First of all update your game to the patch 1.14/2.9/3.5/4.2 if you haven't done yet. As usually start the launcher and use the **Update** tab to update your game.

After that, go to grab the new **CAW** version. You can find it here: <http://www.thesims3.com/game/tools/world>

Download and install it and you're ready to create again your own town!

Note: if you disinstall and reinstall the CAW you will lose your past projects. So, if you have some works to complete, backup your project folder (*MY Documents/Electronic Arts/*
