On the [The sims 3 italian facebook page](#) the staff published system requirement for **The Sims Medieval** ..

. let's go read them! Just keep in mind that these are minimum requirement to run the game.

These requirement are pretty similar to The Sims 3, as producers told some times ago during The Sims Town Hall event. So, if you already run The Sims 3, you should run The Sims Medieval too.

Requirements cite P4 processor, this is a single core processor. If you have a laptop or a dual or a quad core the value is different. If you have a *Centrino* processor on your laptop the equivalent value is about the double, if you have a dual core the equivalent is x2, quad core is x4.

In add, on our [pictures gallery related to The Sims Medieval](#) , you can find some new screens!

System requirements

The Sims Medieval requires at least:

FOR WINDOWS XP

- 2.0 GHz P4 processor or equivalent (this a value for single core processor. If you have a laptop or a dual or a quad core the value is different. If you have a *Centrino* processor on your laptop the equivalent value is about the double, if you have a dual core the equivalent is x2, quad core is x4...)

- 1 GB RAM
- 128 MB Video Card with support for Pixel Shader 2.0
- The latest version of DirectX 9.0c
- Microsoft Windows XP Service Pack 2 (check your Windows upgrade if you don't have service pack 2. If you have service pack 3 is ok!)
- At least 5.3 GB of hard drive space with at least 1 GB of additional space for custom

content and saved games

FOR WINDOWS VISTA (and/or WIN 7)

- 2.4 GHz P4 processor or equivalent (this a value for single core processor. If you have a laptop or a dual or a quad core the value is different. If you have a *Centrino* processor on your laptop the equivalent value is about the double, if you have a dual core the equivalent is x2, quad core is x4...)

- 1.5 GB RAM
- 128 MB Video Card with support for Pixel Shader 2.0
- Microsoft Windows Vista Service Pack 1 (check your Windows upgrade if you don't have service pack 1. If you have service pack 2 is ok!)
- At least 5.3 GB of hard drive space with at least 1 GB of additional space for custom content and saved games

For computers using built-in graphics chipsets under Windows, the game requires at least:

- Intel Integrated Chipset, GMA 3-Series or above
- 2.6 GHz Pentium D CPU, or 1.8 GHz Core 2 Duo, or equivalent
- 0.5 GB additional RAM

FOR MAC OS X

- Mac OS X 10.5.8 Leopard or higher
- Intel Core Duo Processor
- 2 GB RAM
- ATI X1600 or Nvidia 7300 GT with 256 MB of Video RAM, or Intel Integrated GMA X3100.
- At least 5.3 GB of hard drive space with at least 1 GB of additional space for custom content and saved games
- This game will not run on PowerPC (G3/G4/G5) based Mac systems, or the GMA 950 class of integrated video cards.

Windows Supported Video Cards

NVIDIA GeForce series

FX 5900, FX 5950
6200, 6500, 6600, 6800
7200, 7300, 7600, 7800, 7900, 7950
8400, 8500, 8600, 8800
9300, 9400, 9500, 9600, 9800
G100, GT 120, GT 130, GTS 150
GTS 250, GTX 260, GTX 280, GTX 285, GTX 295

ATI Radeon™ series

9500, 9600, 9800
X300, X600, X700, X800, X850
X1300, X1600, X1800, X1900, X1950
2400, 2600, 2900
3450, 3650, 3850, 3870
4850, 4870

Intel® Graphics Media Accelerator (GMA)

GMA 3-series, GMA 4-series

Laptop versions of these chipsets may work, but may run comparatively slower. Standalone cards that are installed in vanilla PCI slots (not PCIe or PCIX or AGP), such as some GeForce FX variants, will perform poorly.

Integrated chipsets such as the ATI Xpress and the NVIDIA TurboCache variants may default to settings that are higher than what would be optimal for them. Graphics settings can be lowered to improve performance.

NVIDIA ION computers require at least 2 GB RAM.

The NVIDIA GeForce FX series is unsupported under Vista.

Mac OS X Supported Video Cards

NVIDIA GeForce series

7300, 7600
8600, 8800
9400M, 9600M GT
GT 120, GT 130

ATI Radeon™ series

X1600, X1900
2400, 2600
3870
4850, 4870

Intel® Graphics Media Accelerator (GMA)

GMA 3-series

How to check system requirements

You can check system requirements for The Sims Medieval in a similar way to The Sims 3.
